

Red Box Maintenance Services

Convenient services for on site collection

Two Convenient Ways for Pick Up and Repair

1

Red Box Service

We provide a complimentary Red Box that serves as a shipping container to return gear units, gearmotors, and electronic components for inspection and repair.

- You determine how often the container needs to be returned. When the Red Box is full, simply send it back to the designated facility for your units to be inspected.
- Once your units are received, an empty Red Box will be promptly returned so that you always have one available.
- All returned units will be thoroughly examined by SEW-EURODRIVE service technicians. After the inspection, and upon your approval of the findings, any necessary service or repairs will be completed, and the units will be returned to you.

2

Pick-Up and Delivery Service

Our Pick-up and Delivery Service provides convenient collection, repair, and return of your units and automation components. In addition, our comprehensive maintenance programs offer a full range of startup, maintenance, and drive management services.

Reduce your system downtime and maintenance labor costs by using our managed maintenance services:

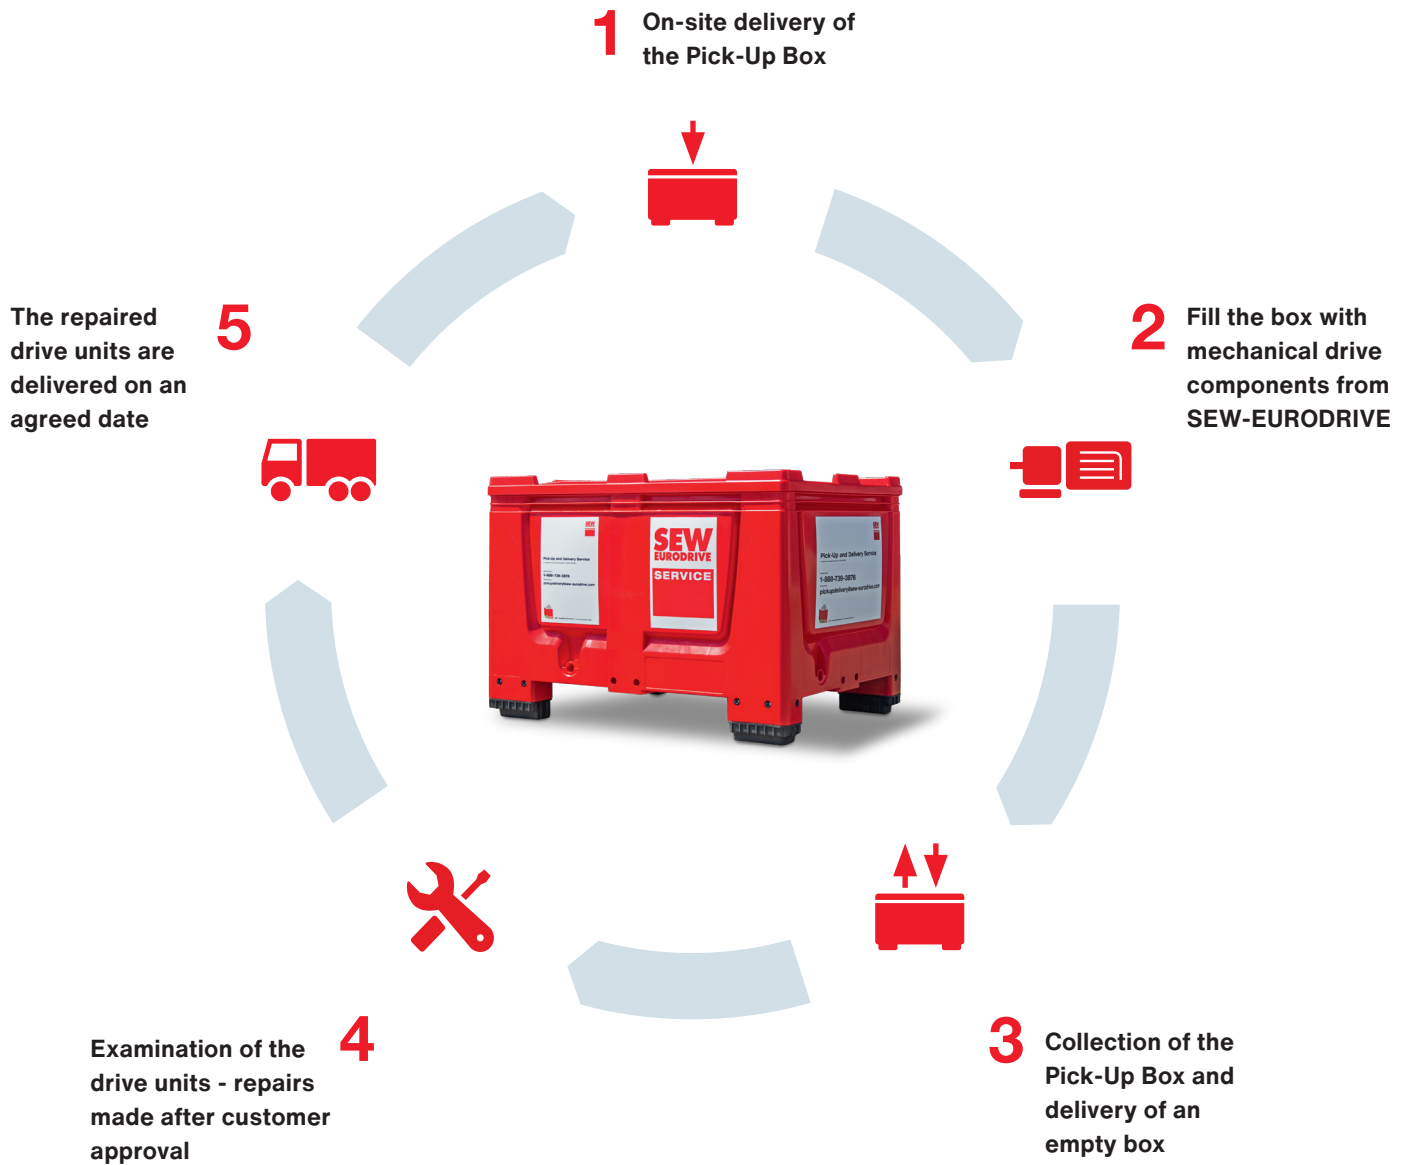

- Custom-scheduled maintenance options
- Reliable repair and delivery times
- Spare inventory management

*Distance limitations apply

Services for the complete system life cycle — tailored to your requirements.
